Great New Laser Text!

By Ed

Dr. Small has created a very readable, well referenced, delightfully complete and unbiased opus on Laser and Light. This textbook is current, easy to navigate and has copious pictures and diagrams, well developed patient education sheets, consents and procedure flow sheets. The physics, histology, tissue interactions and safety of each laser treatment and wavelength are presented in a sensible manner that serves as a great reference for neophytes and more experienced laser practitioners alike. The videos on the ebook are well filmed and offer a wealth of insight.

I regularly recommend this book to my students and staff.

In full disclosure, yes, I am a bit of a nerd and I enjoyed reading every well laid out page. :-)

Congratulations Dr Small, and many thanks for this much needed addition to our library!
