A Great Resource to Start Gaining Your EW Knowledge

By Edmund P. Leigh

Worth Every Cent If You Want to Know Electronic Warfare. I can't recommend this 442 page tome enough. Of course you will need the EW 101, 102 & 103 EW books if you want to fully understand this latest volume by a master writer of engineering electronic warfare lecturer David L. Adamy who is one of the leaders of the 14,000 members of the Society of Old Crows.

For EW 104 the chapters are laid out by the following categories:

- 1) Spectrum Warfare
- 2) Legacy Radars
- 3) Next Generation Threat Radars
- 4) Digital Communication
- 5) Legacy Communication Threats
- 6) Modern Communication Threats

- 7) Digital RF Memories
- 8) Infrared Threats and Countermeasures
- 9) Radar Decoys
- 10) Electromagnetic Support Versus Signal Intelligence

Well crafted writing by an author who has a knack of explaining the complex into simple terms though the electromagnetic spectrum science is very, very complicated. This is place to start learning by someone who knows how to teach well. Yes it is an expensive textbook but it is worth every cent. You will not be disappointed ! There are no royal roads to learning this very complex and evolving art and science.
