NUCLEAR NIGHTMARES: SECURING THE WORLD BEFORE IT IS TOO LATE BY JOSEPH CIRINCIONE PDF

There is a high risk that someone will use, by accident or design, one or more of the 17,000 nuclear weapons in the world today. Many thought such threats ended with the Cold War or that current policies can prevent or contain nuclear disaster. They are dead wrong?these weapons, possessed by states large and small, stable and unstable, remain an ongoing nightmare.

Joseph Cirincione surveys the best thinking and worst fears of experts specializing in nuclear warfare and assesses the efforts to reduce or eliminate these nuclear dangers. His book offers hope: in the 1960s, twenty-three states had nuclear weapons and research programs; today, only nine states have weapons. More countries have abandoned nuclear weapon programs than have developed them, and global arsenals are just one-quarter of what they were during the Cold War. Yet can these trends continue, or are we on the brink of a new arms race?or worse, nuclear war? A former member of Senator Obama's nuclear policy team, Cirincione helped shape the policies unveiled in Prague in 2009, and, as president of an organization intent on reducing nuclear threats, he operates at the center of debates on nuclear terrorism, new nuclear nations, and the risks of existing arsenals.

Nicely balanced and up-to-date views

By James T. Ranney

The great thing about Joseph Cirincione is that he is somehow able to maintain an appropriate balance between accurately portraying the risks of the nuclear age and the positive ways we can overcome them. He ends up on a positive note.

Another good thing about this book is his insider information re the most important national security issues, not just re nukes but also re what to do about the nukes of other countries, such as North Korea and Iran.

Superb work.

An honest, informative, and all around amazing new book!

By Rebecca Unruh

This book is not just for people who are greatly informed about nuclear policy, but rather, it is a necessary addition to every person's nightstand as their next must read book. Joe Cirincione writes about, in a descriptive but easy to understand way, the truly frightening reality of nuclear weapons in our world today. The book is extremely well written and shows Cirincione's passion about fighting the epidemic of global nuclear weapons. It has been one of my favorite books of the year and I recommend it to anyone, from those who know a great deal about nuclear weapons to those who know nothing at all!
