Although social psychology has been traditionally focused on interpersonal relationships, the cognitive revolution in psychology has had the effect of refocusing some social psychology on intra-psychic processes. This area of psychology has become very popular in recent years, yet there is currently no other textbook available for the study of the self. Republished in its original form by Psychology Press in 2007, this book carefully documents the changing conceptions and the value accorded the self in psychology over time. It further outlines the many alternative conceptions of this increasingly central domain in social psychology. New research and conceptions are juxtaposed with the classic and traditional, providing the reader with a comprehensive introduction to the study of the self.

A year later I am still using this book as a reference

By A Customer

First, I should say that I was a student of Dr. Brown's and took his class in which we used this book as the text. But, I still find the information contained in this book useful even now that I am no longer a student. I found this area of psychology very applicable to my daily life, and I am surprised that this is the only book on self-psychology available on the market. He writes in a clear, entertaining manner and he makes the concepts easy to understand. This is a valuable reference to me, and I am certain it will continue to be as I enter graduate study in psychology.

Scholarly, insightful, and accessible

By A Customer

Jonathon Brown has created a book that works in both the home and the classroom. Written as a text for upper-level psychology classes in self-psychology, it manages to span the usual gap between 'informative'

and 'engaging.' An excellent read for the interested layperson and an invaluable resource for the academic.  
Bravo!

Clear, yet dry.

By Aurora F. Rawlinson

I took this class (i.e., self), and it was really nice, I learned a lot about myself. Like I mentioned it is dry and I find some disconnect in the fifth and sixth chapters, but overall it does a good job of communicating the aspects of self. Remember future class takers, self is not personality it is identity with a hint of personality and a dash of motivation. lol
